BUSINESS INTELLIGENCE SOLUTIONS FOR UTILITIES

At BDO, we understand that effective performance management often goes beyond conventional ERP reporting and requires a dedicated analytics solution.

Based on our success with existing utilities clients running Microsoft Dynamics GP and WennSoft Job Cost, we have developed a Business Intelligence (BI) and analytics solution that delivers powerful financial, cost and variance analysis specific to the industry.

Key Benefits

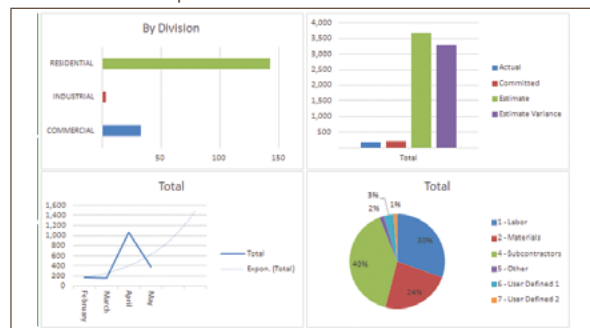

- easy to use
- leverages Microsoft Excel
- combines open and closed WennSoft Job Cost transactions in a single view
- reduces the time spent collecting and manipulating data
- ensures a consistent 'version of the truth' across the organization
- enhances the quality of data related decisions
- users can realize significant cost savings
- easily modified to include additional data

Key Features

- The solution offers a prebuilt WennSoft JC cube facilitating slice and dice analysis in Excel by project, job, cost element, cost code, customer, division, manager, job status, vendor, item, account, GL segment, date and more.
- It is bundled with six other Dynamics GP cubes to help your business

identify trends and make more informed decisions across key business areas, including:

- Finance
- Sales
- Receivables Management
- Purchasing
- Purchase Management
- Inventory
- It is built on an industry leading Data Warehouse Automation (DWA) and cube building solution that reduces implementation and ongoing maintenance time by an expected 80%.
- The solution is scalable to include virtually any data source and data, such as temperature and energy consumption.
- With the option to upgrade to an industry leading enterprise level analytics solution, users can receive enhanced visualization, monitoring, mobility and predictive analytics capabilities.
